KITCHEN CABINETS

Swisstek Aluminium is one of the leading aluminium kitchen cabinet manufacturers in Sri Lanka. As Swisstek Aluminium cares about quality more than quantity, we have gained the trust of our customers bolstered through good customer feedback and have an excellent track record in terms of quality and design. Swisstek Aluminium kitchen cabinets are made from top quality aluminium that is high in strength and durability. It can withstand long term pressure and impacts from daily activities. Unlike ordinary aluminium cabinets, Swisstek Aluminium cabinet bodies are connected with multiple aluminium planks. These special structures provide the cabinet with stronger support making them more durable than ordinary aluminium cabinets. Additionally, Swisstek Aluminium kitchen cabinets also come with a host of other attractive features.

THE ADVANTAGES OF OUR KITCHEN CABINETS

DURABLE

As moisture and heat are common in the kitchen, aluminium is the only material that can withstand both without being affected. Aluminium kitchen cabinets are therefore more durable.

LASTING PERFORMANCE

The secret to longer lasting aluminium kitchen cabinets lies within the thickness and structure of the bodies. Thick aluminium bodies provide better support and do not bend or deform easily.

WATERPROOF

Aluminium kitchen cabinets are totally waterproof. Any residual moisture from damp kitchenware will not do any harm to aluminium kitchen cabinets.

CUSTOMIZABLE DESIGNS AND COLOURS

Swisstek Aluminium kitchen cabinet profiles are totally customizable with 5 wood finished designs and a wide range of colours for you to choose from.

CHEMICAL RESISTANT

Aluminium is a very stable metal, it basically does not react with any spillage of mild acidic liquid including vinegar and ketchup. Powder coated colours on the frame of aluminium kitchen cabinets also do not fade or dull when they come in to contact with water.

PERFECT FOR DIFFERENT CLIMATES

Aluminium is not affected by humidity. In other words, aluminium kitchen cabinets are able to withstand different climate conditions with ease.

EASE OF CLEANING AND MAINTENANCE

Aluminium kitchen cabinets do not require much care and maintenance. The cleanliness of aluminium kitchen cabinets can be maintained by simply wiping off dirt, dust and grease with a damp cloth.

ODOURLESS AND HYGIENIC

Aluminium is odourless and more hygienic compared to wood or fibreboard. The non-porous surface of aluminium actually prevents it from becoming the breeding ground of bacteria and other harmful micro-organisms.

ANTI-RUST

The stable nature of aluminium oxide helps prevent aluminium cabinets from rusting.

PEST RESISTANT

One of the main concerns of many homeowners is that wood or fibreboard kitchen cabinets are prone to pest infestations like termites. With aluminium kitchen cabinets, you can rest assured that your kitchen cabinets are safe from pest infestations. Thanks to the non-porous surface of aluminium, pest and termite infestations can be effectively prevented, guaranteeing that your kitchen cabinets are safe from them.

ASSEMBLY STEPS

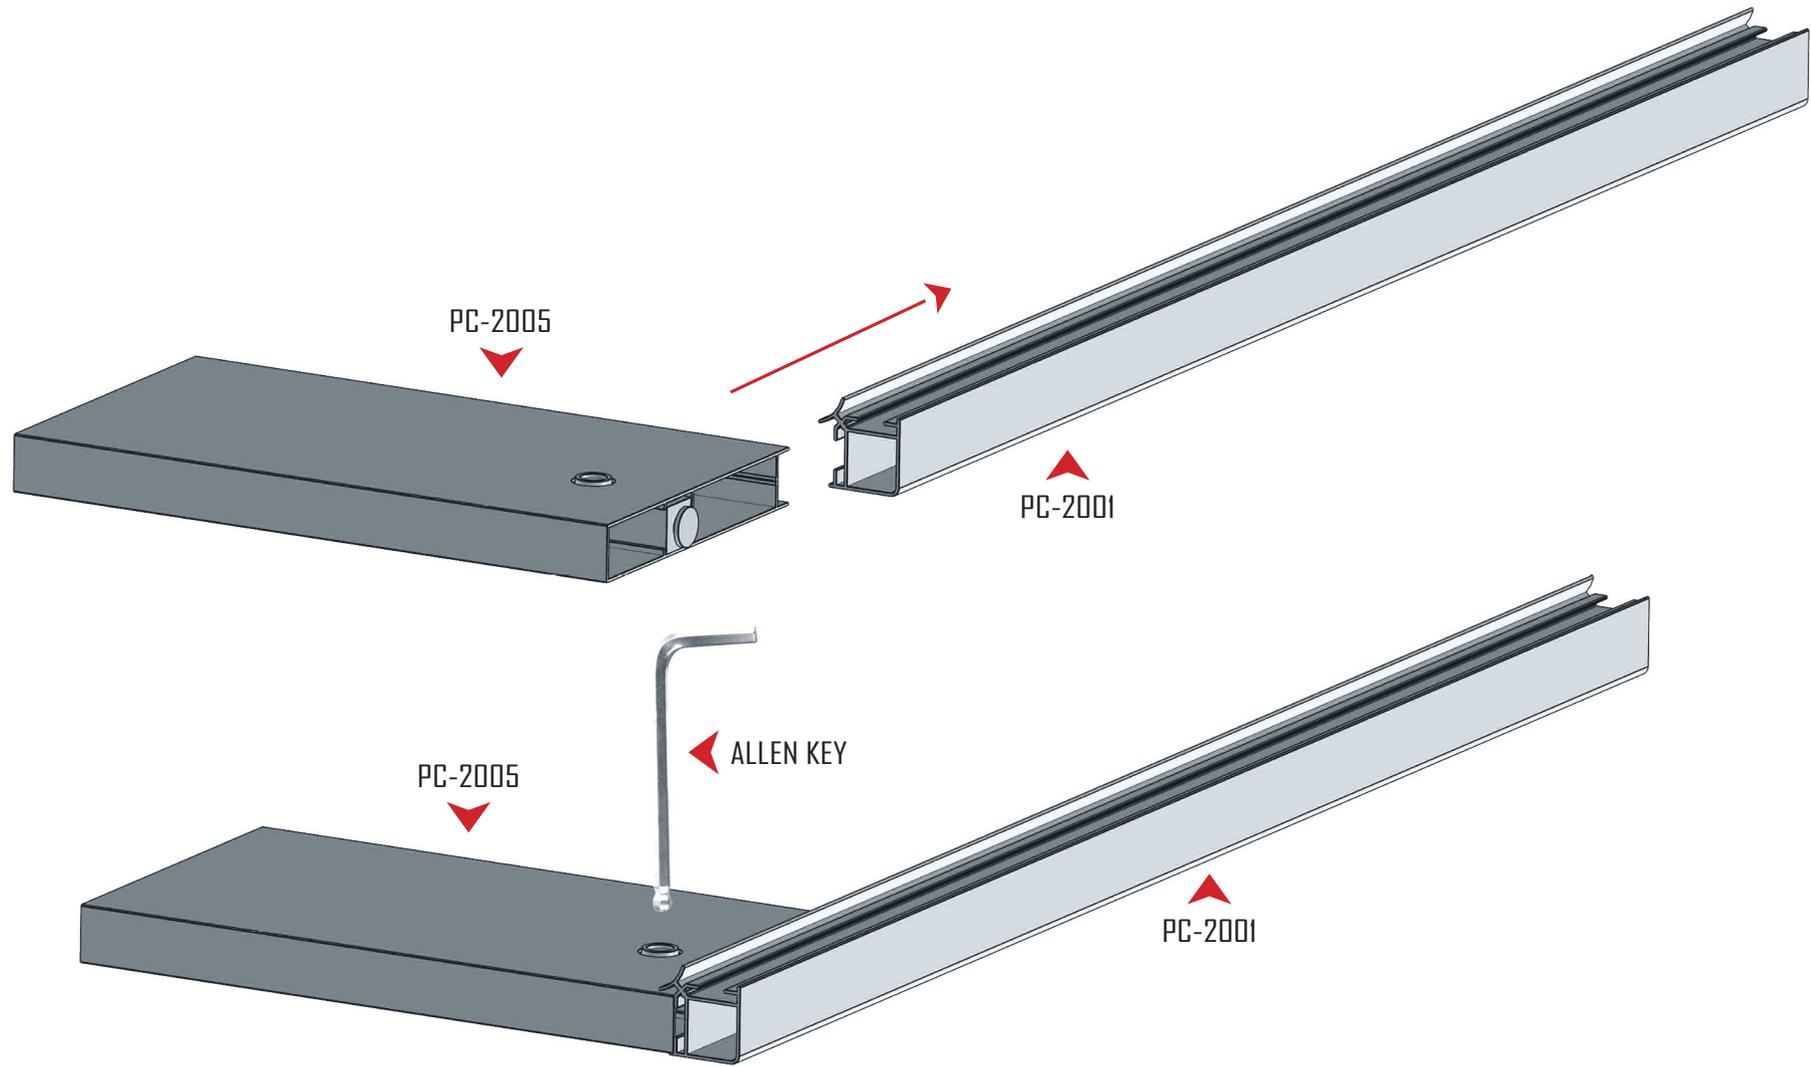

Kitchens have acquired an increasing value as an integral and core part of the style of your home. And Swisstek Aluminium Kitchen profiles are able to fulfil both your aesthetic and practical needs when it comes to the design of your kitchen. Swisstek Aluminium Kitchen profiles are easy to assemble while at the same time being more durable than wood. Aluminium is waterproof and fire and termite resistant which makes it an obvious choice for the modern kitchen. Aluminium kitchens are innovative and reflect the tastes of a pragmatic person who also thinks out of the box.
